

TO WHOM IT MAY CONCERN

Electronaca Inc. certifies that: it deploys and manages several types of radio frequency equipment.

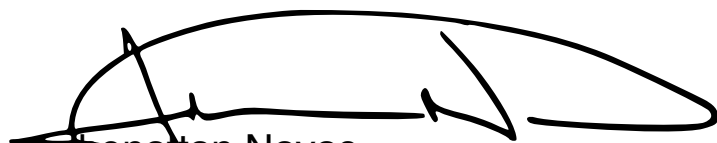

We will conduct experiments, if approved with a basic setup of CBRS equipment, to train our personnel, and develop tools and procedures to service such technology.

We commit a number of resources, including a project manager, to successfully achieve an excellent level of expertise and knowledge in this frequency band with the CBRS radios.

Also, Electronaca Inc has more than 20 years experience in the RF industry, deploying radio frequency networks with several RF Engineers on staff.

For the reasons previously mentioned, we feel that we meet the eligibility criteria for an Special Temporary Authority experimental license, as set forth in the commission rules.

Thank you for your attention
