

July 22, 2026

In Application of: EMG USA, LLC.

To Operate in the 2240 - 2260 MHz and 3340-3360MHz Telemetry Band to Provide TV Coverage in Los Angeles, CA.

ATTN.: Microwave Branch

EMG USA hereby requests Special Temporary Authority (STA) to operate in the 2240 - 2260 MHz and 3340-3360MHz Telemetry Band pursuant to Section 21.25 of the Commission's Rules. EMG USA requests that the Commission grant temporary authority to operate on one 20 MHz wide channel centered at 2250 MHz and one 20 MHz wide channel centered at 3350 MHz on August 20, 2026 with intermittent usage. Please note EMG is fully capable of working 2200-2300MHz and 3300-3400MHz. EMG can work within these parameters and if needed can move and adjust.

As explained below, EMG USA is filing an STA request for the Live Television Transmission CBS Sport's coverage of a NFL preseason game. EMG USA submits that there are extraordinary circumstances warranting a grant of the STA request. CBS Sports has contracted EMG USA to provide the necessary microwave for the Live Transmission of this event. Due to the extreme frequency congestion in Los Angeles, CA, coupled with the added congestion from traditional television and news coverage of these special events, EMG USA requests the use of channels in the 2240 - 2260 MHz and 3340-3360MHz telemetry band. EMG USA certifies that the operation of the requested channels for the purposes specified herein will not cause interference to any established stations.

Grant of the instant request for STA in the 2240 - 2260 MHz and 3340-3360MHz Bands would serve the public interest by enabling EMG USA to supply the requested remote video coverage for this event. The proposed service would enhance coverage of the event by providing on the spot pictures from mobile locations that would not otherwise be available to the Production Company. EMG Stop Buzzer: Stephen Tobias (410) 564-9291.

In accordance with Section 74.633 of the Commission's Rules, the following is provided:

Type and Manufacturer of Equipment: Vislink Hcam

Power Output: 100mw ERP: 100mW Emission: 20M0X7F

Frequencies:

2250.000MHz, 20M0X7F@100mW

3350.000MHz, 20M0X7F@100mW

Area of Operation: .2Km around stadium

Coordinates:

Sofi Stadium

08.20.2026

N 33 57 12

Los Angeles, CA

W 118 20 22

Antenna Height: 6' AGL Antenna: 0dB Omni Antenna Gain: 0dBi

Dates of Operation: August 20,2026 (Intermittent Usage during this day)

EMG USA requests an STA to operate on the above-referenced frequency for a period not to exceed one day. No application for regular authorization will subsequently be filed. EMG

USA certifies that no party to the application is subject to a denial of federal benefits pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988, 21 U.S.C §853(a).
