

August 11, 2026

In Application of: EMG USA, LLC.

To Operate in the 2200-2300 and 3300-3400 MHz Telemetry Band to Provide TV Coverage in Nashville, TN. Stop Buzzers Stephen Tobias 410-564-9291 and Carston Bell 626-255-9216

ATTN.: Microwave Branch

EMG USA hereby requests Special Temporary Authority (STA) to operate in the 2200-2300 and 3300-3400MHz Telemetry Band pursuant to Section 21.25 of the Commission's Rules. EMG USA requests that the Commission grant temporary authority to operate on three channels in the 2200-2300 and 3300-3400 MHz with a 10MHz bandwidth on 9/9/2026 until 9/13/2026 with intermittent usage. EMG plans to use three channels in the 2200-2300 MHz range if it can be approved in the area during the mentioned dates. If this cannot be accommodated, could we please not deny this request and approve for the 3300-3400 MHz channels.

As explained below, EMG USA is filing an STA request for the Live Television Transmission of OS Studio's coverage of a "Blizzcon". EMG USA submits that there are extraordinary circumstances warranting a grant of the STA request. TNDV has contracted EMG USA to provide the necessary microwave for Live Transmission of this event. Due to the extreme frequency in the Anaheim, CA area, coupled with the added congestion from traditional television and news coverage of the special event, EMG USA requests the use of channels in the 2200-2300 MHz telemetry band. EMG USA certifies that the operation of the requested channels for the purposes specified herein will not cause interference to any established stations.

Grant of the instant request for STA in the 2200-2300 and 3300-3400 MHz Band would serve the public interest by enabling EMG USA to supply the requested remote video coverage for this event. The proposed service would enhance coverage of the event by providing on the spot pictures from mobile locations that would not otherwise be available to the Production Company.

In accordance with Section 74.633 of the Commission's Rules, the following is provided:

Type and Manufacturer of Equipment: Vislink Hcam

Power Output: 100mw ERP: 100mW Emission: 10M0X7F

Frequencies: Three channels in 2GHz preferably. If 2GHz cannot be approved, please do not deny and approve the 3GHz if possible.

2200-2300.0MHz, 10M0X7F@100mW

3300-3400.0MHz, 10M0X7F@100mW

Area of Operation: .2Km around venue.

Coordinates:

Anaheim Convention Center 9.9-13.2026

N 33 48 01

Anaheim, CA

W 117 55 14

Antenna Height: 6' AGL Antenna: 0dB Omni Antenna Gain: 0dBi

Dates of Operation: September 9, 2026 until September 13, 2025 (Intermittent Usage during these days)

EMG USA requests an STA to operate on the above-referenced frequency for a period not to exceed five days. No application for regular authorization will subsequently be filed. EMG

USA certifies that no party to the application is subject to a denial of federal benefits pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988, 21 U.S.C §853(a).

Should you have any questions regarding this matter, please contact, Stephen Tobias, by telephone (410) 564-9291

Respectfully submitted,

By: Stephen Tobias
