In Application of: EMG USA

To Operate in the 1440-1485 MHz Telemetry Band to Provide TV Coverage in Forest Hills, NY.

ATTN.: Microwave Branch

EMG USA hereby requests Special Temporary Authority (STA) to operate 1440-1485 MHz Telemetry Band pursuant to Section 21.25 of the Commission's Rules. EMG USA requests that the Commission grant its temporary authority to operate on the frequency range 1440-1485 MHz centered at 1445.0 MHz, 1460.0 MHz and 1480.0 MHz each at 10 MHz wide bandwidth on 9/6/2026 until 9/10/2026 with intermittent usage.

As explained below, EMG USA is filing an STA request for the Live Television Transmission of the Republican National Convention. EMG USA submits that there are extraordinary circumstances warranting a grant of the STA request. Alongi Media have contracted EMG USA to provide the necessary microwave for the Live Transmission of this event. Due to the extreme frequency congestion in Dallas, TX and throughout the United States, coupled with the added congestion from traditional television and news coverage of these special events, EMG USA requests the use of channels in the 1440-1485 MHz telemetry band. EMG USA certifies that the operation of the requested channels for the purposes specified herein will not cause interference to any established stations.

EMG requires non-standard frequency band due to the extensive Part 74 spectrum utilization at this Republican National Convention event. This event necessitates making coordinated temporary use of additional spectrum in 1.4GHz band for LPAS operations. EMG USA is fully aware of pre-coordinating through AFTRCC. If any problems or interference occurs in these cities, EMG will shut down or shift frequencies. EMG will be very low power (100mW) and will have stop buzzers in place. Stop Buzzers: George Howson 240.422.2395 and Stephen Tobias 410.564.9291

Grant of the instant request for STA in the 1440-1485 MHz Band would serve the public interest by enabling EMG USA to supply the requested remote video coverage for this event. The proposed service would enhance coverage of the event by providing on the spot pictures from mobile locations that would not otherwise be available to the Production Company.

In accordance with Section 74.633 of the Commission's Rules, the following is provided:

Applicants Name: EMG USA

Address: EMG USA

107 SE Parkway Ct
Franklin, TN 37064

Type and Manufacturer of Equipment: Vislink

Power Output: 100mw ERP: 100mW Emission: 10M0X7F

Frequencies: 1445.0 @100mW 10M0X7F

1460.0 @100mW 10M0X7F

1485.0 @100mW 10M0X7F

Area of Operation: .2Km around venue.

Coordinates:

American Airlines Center
Dallas, TX

09.06-10.2026

N 32 47 26
W 96 48 37

Antenna Height: 6' AGL Antenna: 0dB Omni Antenna Gain: 0dBi

Dates of Operation: September 6, 2026 until September 10,
2026 (Intermittent Usage during these 5 days)

EMG USA requests an STA to operate on the above-referenced frequency for a period not to exceed five days (5 days). No application for regular authorization will subsequently be filed. EMG USA certifies that no party to the application is subject to a denial of federal benefits pursuant to Section 5301 of the Anti-Drug Abuse Act of 1988, 21 U.S.C §853(a).

Should you have any questions regarding this matter, please contact, Stephen Tobias, by telephone (410) 564-9291
