Subject: Request for Info - STA File #0978-EX-ST-2014

Message:

Dear Doug,

In response to your email (pasted below):

1. Please uncheck the confidentiality box from the form itself if the FCC is OK with the location portion of the form. The equipment is mobile and we will be using it in the radius stated on the form but only in few specific areas of interest. The client participating in the market trial is an oil exploration company and they are fine with "general" areas of operation(as currently stated on the form) being public. However, if the commission requires more exact locations of operation (in the case that operation in some areas in the radius is prohibited due to being too close to sensitive installations airports/military bases/observatories), the client may have a problem with making the exact locations public due to potential commercial impact.

2. From our side (the manufacturer), our only concern is the exhibit describing the modulation being public. May we keep that exhibit confidential? If not, can you please advise how to modify the form so the modulation description exhibit would not be necessary. i.e. is there a more general way to describe the modulation. Perhaps changing the fifth character, the types of modulation of the main carrier to "W" would be more appropriate than using "V" given the information provided in the modulating signal description.

3. The charge for the application was \$135. Was it the \$65 for confidentiality and \$65 for the application? Or are those separate charges for each of the locations? Or did I submit the same form twice by accident?

Thank you very much for your help!

Respectfully,

Boris Aleynik

Applicant: Georazvedochnaya Company

File Number: 0978-EX-ST-2014

Correspondence Reference Number: 25591

Date of Original Email: 10/28/2014

You have requested confidentiality for the entire application. As a matter of policy, we will not withhold from public any information necessary for interference mitigation. This includes applicant name, contact info, location, frequency and power. If there is nothing in the form itself that cannot be released to the public, state this. The confidentiality justification exhibit states that only the modulating signal description exhibit is confidential. If this is so, I will uncheck the confidentiality box for the form itself.

The confidentiality justification exhibit must be viewable to the public. Can I remove the confidentiality for

that exhibit or would you like to submit a new exhibit?
