

FCC Form 442 - Narrative

EnteroMedics, Inc.
0019-EX-ML-2008

The applicant continues to use the authorization issued under call sign WE2XFB for research and experimentation in furtherance of its breakthrough medical technology. All technical and location parameters in its current authorization remain in effect. The instant application is filed in order to increase the number of authorized units to 300 units.

The applicant seeks the increase in number of units in order to continue developing sufficiently representative statistical data regarding the safety and efficacy of the device.

The public interest will be served by the authorization of additional units by permitting the applicant to thoroughly develop and test life saving medical devices.
