Subject: STA File # 0024-EX-ST-2001 - Request for Info

Message:

Since 2110 - 2170 MHz has not been licensed for UMTS yet, we need additional information to process your application. First, you should narrow down the above band to the least amount of spectrum necessary to complete your testing. Please submit sub-bands that you can get by with. Second, you must show how you intend to coordinate with licensed users of the sub-bands you choose or define testing methodology that shows that coordination is not necessary due to no realistic risk of interference to licensed users.

Also, I noticed that you have added 1920 - 1930 MHz to this request which you have not requested before. In order for you to use this band you must coordinate with UTAM.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of January 31, 2001 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
