

Exhibit 1

Ericsson, Inc. hereby requests a modification of its existing experimental authorization (call Sign KF2XEF, File No. 4848-EX-ML-95) to test 100 wireless business systems operating in the isochronous 1880-1900 MHz. The total number of radiating units under this authorization, including authority for the 1920-1930 MHz band, will not exceed 5,000.

The purpose of the modification is to evaluate the operation of low power equipment Ericsson has developed for the licensed PCS band. In this regard, Ericsson will comply with Commission rules and policies established to ensure interference free operation in the PCS band, including but not limited to, coordination with PCS licensees.

Ericsson, Inc. seeks authority to operate in the frequency band in question throughout the United States as currently authorized on its existing experimental license. Grant of this modification will enable Ericsson to evaluate and test products which will lead to full development of commercially acceptable product at the earliest possible time.
