Subject: Additional Information Request

---

Message:

1. Explanation of how it would coordinate any usage with a Spectrum Access System (SAS).

We will utilize a connection to Google SAS to coordinate spectrum usage via remote connection from our lab in Plano, TX.

2. Explanation of how it would specifically avoid causing interference to incumbent and commercial operations in the band, including General Authorized Access (GAA).

We will coordinate with local CBRS users as required and will curtail our spectrum usage to the spectrum assigned by the SAS in order to avoid causing any interference.
