Request on Timing

The measurements are an essential step so that we can conduct 5G user trials later in 2017. We would ask that when the approval is granted, it is for a period beginning one week after the grant is issued, even if that is before or after our listed start date of 6/1/2017. We expect the measurements to take no more than 2 weeks, but out of an abundance of caution are requesting authorization for one month.
