

Directional Antenna Information

There will be 4 base station units placed on the Las Vegas Motor Speedway Media Center, at the coordinates listed on Form 442, to cover different portions of the track. These will have directional antennas.

	Base Station 1	Base Station 2	Base Station 3	Base Station 4
Width of beam in degrees at the half power point				
Orientation in horizontal plane				
Orientation in vertical plane				

The peak ERP for each base station will be 63.85. dBm. The peak EIRP for each base station will be 66 dBm.

Additional Information about Mobile Transmitters.

The mobile units will not contain directional antennas. The peak EIRP for each mobile transmitter/antenna pair will be 33 dBm.
