

This application will be utilized for testing GPS equipment on Public Safety/Fire vehicles. Equipment will be utilized to re-radiate GPS signals within vehicle/apparatus bay, inside building.

Objective is to verify if GPS signals are able to be broadcast to Fire vehicles within building.

This testing will verify functionality of GPS/Automatic Vehicle Location equipment on Fire trucks and confirm functionality with mapping system. These tests will enhance public safety capabilities.

Brian Zastoupil

A handwritten signature in dark ink, appearing to read "Brian Zastoupil", with a stylized, sweeping flourish at the end.

Radio Systems Coordinator
