FEDERAL COMMUNICATIONS COMMISSION
EXPERIMENTAL
SPECIAL TEMPORARY AUTHORIZATION**

EXPERIMENTAL

(Nature of Service)

WK9XKR

(Call Sign)

XT FX MO

(Class of Station)

0354-EX-ST-2017

(File Number)

NAME FCL Tech, Inc.

This Special Temporary Authorization is granted upon the express condition that it may be terminated by the Commission at any time without advance notice or hearing if in its discretion the need for such action arises. Nothing contained herein shall be construed as a finding by the Commission that the authority herein granted is or will be in the public interest beyond the express terms hereof.

This Special Temporary Authorization shall not vest in the grantee any right to operate the station nor any right in the use of the frequencies designated in the authorization beyond the term hereof, nor in any other manner than authorized herein. Neither the authorization nor the right granted hereunder shall be assigned or otherwise transferred in violation of the Communications Act of 1934. This authorization is subject to the right of use of control the Government of the United States conferred by Section 706 of the Communications Act of 1934.

Special Temporary Authority is hereby granted to operate the apparatus described below:

Purpose Of Operation:

This operation will test potential new communications applications and equipment.

Station Locations

- (1) Camarillo (VENTURA), CA - NL 34-12-31; WL 119-04-42
- (2) MOBILE: Camarillo, CA, within 50 km, centered around NL 34-12-31; WL 119-04-42

Special Conditions:

- (1) In lieu of frequency tolerance, the occupied bandwidth of the emission shall not extend beyond the band limits set forth above.
- (2) Licensee should be aware that other stations may be licensed on these frequencies and if any interference occurs, the licensee of this authorization will be subject to immediate shut down.
- (3) FLC Tech, INC must obtain consents from the Broadband Radio Service licensees prior to operation in 2400.5-2475 MHz and 18-20 GHz band.

Special Conditions:

- (4) FLC Tech, INC must coordinate with the Fixed Microwave Service licensees prior to operation in 2400.5-2475 MHz, 18-20 GHz, 24-27.5 GHz.
- (5) FCL Tech, INC must coordinate with the local Society Broadcast Engineer frequency coordinator prior to operation in 2400.5-2475 MHz and 18-20 GHz bands.
- (6) FCL Tech, INC must coordinate and comply with all restrictions levied by Western Area Frequency Coordinator (WAFC):

- (7) FCL Tech, INC must also be aware concerning out-of-band emissions above 5850 MHz into the DSRC band used for transportation safety applications.
- (8) FCL Tech, INC must be "notification" of the Location & Monitoring Service licensees (902-928 MHz) within 50 miles of the test area.
- (9) FCL Tech must coordinate with WAFC prior to transmit.
- (10) FCL must not utilize the bands 1700 - 1850 MHz and 4400 - 4950 MHz, due to ongoing law enforcement activities in the request area.
- (11) FCL must notch the following frequencies:
 - 5665 MHz +/- 6 MHz
 - 5700 MHz +/- 6 MHz
 - 5750 MHz +/- 7.5 MHz
- (12) FCL must exclude the 2375-2400.5 MHz band to protect Air Force operations in the area.
- (13) FCL must exclude the 31.3 -31.8 GHz frequency band in accordance with Footnote US246 in order to prevent potential impacts to NASA passive sensors.
- (14) Operation is NOT PERMITTED using the frequency band 27.5-30 GHz for going upward because it is potential for harmful interference to existing license satellite operations.

Special Conditions:

- (15) Within five business days prior to operating, FCL Technologies, Inc., must notify licensees of earth stations operating in the 18-20 GHz band within 25 kilometers of the locations from which experimental operations will occur. Also, FCL Technologies, Inc., must notify satellite operators in the 24.0-27.5 GHz bands. FCL Technologies, Inc. must also provide such notification to the National Spectrum Managers Association frequency coordinators by email. (see http://wireless.fcc.gov/services/index.htm?job=licensing_1&id=microwave). The notice must include the name and contact information of the stop buzzer personnel that will be available to cease operations in the event of reported interference. The notification should include the testing parameters (specific location(s), antenna gain(s), antenna height(s), antenna orientation, antenna patterns, eirp density) and day and times of each test. Consult the IBFS database to identify licensed earth station in the 18 - 20 GHz band and satellite operators in the 24 - 30 GHz band.
- (16) Experimental station shall use the minimum power level necessary to establish communications links to minimize potential interference to licensed users.
- (17) No automatic renewal for this authorization.
- (18) This authorization is without prejudice to any determination that the Commission may make regarding pending or future experimental satellite earth station applications
- (19) Operations are on a non-interference basis (NIB) and shall not cause harmful interference to, and shall not claim protection from, interference caused to it by any other lawfully operating station and it shall cease transmission(s) immediately upon notice of such interference and notify the FCC in writing.
- (20) Operation in the 24 -30 GHz is going downward as specified by the condition below.
 - Operation in the 24.0 - 30.0 GHz, the transmitting main beam pointing antenna is limited to azimuth angles between 280 to 360 degrees and 0 degrees to 80 degrees.
 - Operation in the 24.0 - 30.0 GHz, the transmitting main beam pointing antenna is limited to an elevation angles between -20 to -90 degrees below the horizon only. Elevation angles greater than -20 degrees from the horizon are prohibited.
- (21) Operations in the 18-20 GHz band, the transmitting main beam pointing antenna is limited to elevation angle between 0 to 70 degrees above the horizon in a fixed ground station.
- (22) This authorization SUPERSEDES the previous issued authorization with the same call sign and file number: amend special conditions.
