Application Narrative for Proposed Equipment

Proposed Program

FedEx is proposing GPS within their aircraft hangar buildings for testing purposes.

Objectives

We seek to accomplish the following objectives:

1. Illumination of the part of the aircraft facilities, located at 2459 Aviation Drive and 7661 North Perimeter Road in Indianapolis with a GPS signal to allow for the testing and experimentation indoors for continued exploration of utilizing GPS technologies within their aircraft to provide innovative applications and continue to provide safe products.
2. Further design, development and enhancement of existing GPS applications to provide greater efficiency and more effective means of utilizing GPS derived information.
