Hello Linda,
Thanks for your information. I will post it on the www.smp-te-sbe48.org
Web site as soon as possible in the frequency coordination section.
Regards,
Bill

Subject: Frequency Coordination - Colorado Springs
Importance: High

Bill,

Flarion Technologies has filed for an STA for a COLT demo in Colorado Springs, CO scheduled for Jan. 13-16. The demo involves the COLT (Cell on Light Truck) which will be parked at the Marriott Courtyard in Colorado Springs. The COLT operates on a 1.25 MHz channel in the 747-762 MHz band with 20 watts ERP. The demo will utilize several mobiles operating on a paired channel in the 777-792 MHz band with 600 milliwatts ERP.

The COLT antennas are mounted on a mast extendable to 40 feet above ground level.

The actual demo is scheduled for Jan. 15-16. The COLT will arrive on Jan. 13 for testing.

This is the same demo that I coordinated with you last January in Denver. Please let me know if you have any concerns/questions regarding this demo. I would appreciate an email reply so I can document our frequency coordination process.

Thank you for your consideration,

Linda
