**Subject:** Frequency coordination

**Importance:** High

Hi Dennis,

Flarion Technologies has filed for an STA for a demonstration of our technology in Kingfisher, Oklahoma scheduled for January 30 - February 14. We operate on a 1.25 MHz channel in the 747-762 MHz band with 20 watts ERP. The demo will utilize several mobiles operating on a paired channel in the 777-792 MHz band with 600 milliwatts ERP.

Our antennas will be temporarily mounted on an existing cell tower..

Please let me know if you have any concerns/questions regarding this demo. I would appreciate an email reply so I can document our frequency coordination process.

Thank you for your consideration,

Linda
