Subject: Frequency Coordination - San Jose

Importance: High

Bill,

Flarion Technologies has filed for an STA to demonstrate its broadband mobile IP technology in Cupertino, CA scheduled for February 17 - February 20, 2004.

The demo involves our COLT (Cell on Light Truck) which will be parked at 1 Infinite Loop Drive. The COLT operates on a 1.25 MHz Channel in the 747-762 MHz band with 20 watts ERP. The demo will utilize several mobiles operating on a paired channel in the 777-792 MHz band with 600 milliwatts ERP.

The COLT antennas are mounted on a mast extendable to 40 feet above ground level.

The actual demo is scheduled for February 19. The COLT will arrive on February 17 for testing.

This is the same demo that I previously coordinated with you in April of last year at the San Jose Convention Center.

Please let me know if you have any concerns/questions regarding this demo. I would appreciate an email reply so I can document our frequency coordination process.

Thank you for your consideration,

Linda
