Subject: Re: FCC-STA Application - Frequency Coordination

This is the only thing I have on my database at this time. Shoreline is located on Burnet Road north of Parmer (far North side) and KTBC is downtown at 10th and Brazos, and this is not football season (UT sports). **Your test site is a few blocks from me, but we wont have any mics in the area yet on those frequencies during that time.** You might want to give Ken Smith at KTBC a heads up for that part of town, so there wont be any surprises. He can be reached at 512-495-7773.
