Subject: Re: Coordination w/ Low Power Auxilliary Stations

Thanks. I've already contacted KIRO-TV. He's got wireless mics in the band. He's OK with working through George Bisso who is the SBE coordinator for the area. I'm in contact with George to work out the frequency use. I'm working on the other licensees.

I will forward the documentation I receive.
Thanks for your quick work on this.

Barclay.

Barclay:

Thanks for the Email and confirmation that we talked. All looks OK on this end. I have discussed your proposed operations with Tom Pierson, the Director of Engineering for Entercom Seattle, and he is comfortable with your proposal as you outlined it. We understand that if any interference does occur, that we should contact either George Bisso or you.

John - As we discussed, Flarion has requested an STA to operate at two locations in your area. We are now aware of the operating frequencies of your wireless microphones and will select a frequency that will not interfere with those operations.

Should you experience any problems during this STA, please contact me or George Bisso and we will resolve any issues as quickly as possible.

Thanks for your help in this matter,

Here is the King Broadcasting coordination response. I believe this covers both WPRS457 and BLP01215.

Thanks,
Barclay.

Hello:

We have received your prior co-ordination and on the surface everything looks interference free.

We would like cell and or pager numbers so we may contact you should there be a problem.

Here is the KIRO-TV (BLP01135) frequency coordination response. That covers the four facilities identified by the Wireless Bureau. We are working with George Bisso, the SBE coordinator on final frequency selection and coordination.

Hi Barclay

I received your Message. Thanks for the heads up. It doesn't look like you should cause us any problem.
