Subject: Frequency Coordination

Hi Bob,

Flarion Technologies has filed for an STA with the FCC to demonstrate our broadband mobile IP technology in Washington, DC scheduled for May 1 - June 21, 2004. The demo involves our basestation which will be located in a building at 441 4th Street, NW. The basestation will operate on a 1.25 MHz Channel in the 747-762 MHz band with 20 watts ERP. The demo will utilize several mobiles operating on a paired channel in the 777-792 MHz band with 600 milliwatts ERP. This is the same type of demo that we have coordinated with you in the past.

Please let me know if you have any concerns/questions regarding this demo. I would appreciate an email reply so I can document our frequency coordination process.

Thank you once again for your consideration.

Linda Plesnik
