If indeed you coordinate this with our bay area frequency coordinating committee, (I believe currently chaired by Bill Ruck) and it passes their screening of conflicts this will suffice for KQED.

Subject: Frequency Coordination

Flarion has filed for an STA to demonstrate its broadband mobile IP technology at the San Jose Convention Center. FCC records indicate that KQED

has a Broadcast Auxiliary Low Power license (wireless microphones) in the region.

As we discussed, Flarion will be coordinating this proposal with Bill Ruck the SBE coordinator for the area. If this meets your frequency coordination requirements, please respond to this email, so we can document our process.

We would be happy to supply any further information you require. Thank you for your consideration in this matter.
