Subject: Frequency Coordination
Importance: High

Flarion Technologies has filed for an STA with the FCC to demonstrate our broadband mobile IP technology in Hot Springs, VA scheduled for September 24-28, 2004. The demo involves our COLT (Cell on Light Truck) which will be parked at The Homestead Hotel located at Rt. 220/Main St. The COLT operates on a 1.25 MHz Channel in the 747-762 MHz band with 20 watts ERP. The demo will utilize several mobiles operating on a paired channel in the 777-792 MHz band with 600 milliwatts ERP. The COLT antennas are mounted on a mast extendable to 40 feet above ground level.

The actual demo is scheduled for Sept. 26-28. The COLT will arrive on Sept. 24th for testing.

Please let me know if you have any concerns/questions regarding this demo. I would appreciate an email reply so I can document our frequency coordination process.

Thank you for your consideration.
