Subject: Test Window...

Importance: High

Mr. Kennedy,

In our efforts to accomplish this testing Fleetwood was anticipating being approved prior to the start date requested of Dec. 6th. As you know this was not the case. Fleetwood was counting on this time between approval and the actual start date to acquire the equipment needed. We may not be able to get the equipment delivered to our location in time before the requested testing window expires on Dec. 11th.

If there is an easy way to move the testing window to the next week we would greatly appreciate it. That would give us plenty of time to contact the agencies listed at the bottom of the license indicated and get the equipment delivered to our facility.

Unless this request will cause a major re-work of the license on our part Fleetwood is requesting that you see if we may have the testing window moved from Dec.6th -11th to Dec. 13th - 17th.

If this request to move the testing window will cause a gross re-work of the license please disregard this request. If Fleetwood can not get the required equipment delivered in time to use it by Dec. 11th we will simply not be using the granted license at all. Instead Fleetwood will have to submit an identical application with test dates far enough in the future that will ensure we can get the equipment here on time.

Also, Fleetwood has inadvertently lost the document "Explanation of testing" that was submitted. Now that the license has been approved I am no longer able to view that document from your web site. Can you please forward a copy of that document to me via email?

Thank you,

David A. Nyberg II BSEE
