Subject: Request for Info -File #0079-EX-ML-2006

Message:

The FAA can no longer support the use of 5145 MHz for your system for either your base or airborne use. The 5091-5150 MHz band was re-allocated at WRC-07 for airport LAN operations. The FAA suggests that you move your operations to the 5350-5460 MHz band. Select a frequency in this band, let us know your choice and we will re-coordinate it.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of July 31, 2008 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
