Message:

Leann:

Concerning your 4/12/11 query regarding FAU's use of an emission designator 1M00GXW in its experimental application 0542-EX-PL-2010.

I finally was able to get hold of someone at Tecore (the equipment manufacturer) his email is below. Apparently there was a mistake and the emission designator is not 1M00GXW, but instead should be 1M25F9W. Is this acceptable as a correction in this form or must we amend the application?

Hi Evan,

The 1M0GWX refers be the CDMA emission designator, which should be 1M25F9W which is the FCC recommended designator for CDMA. I'm not sure if you can just reply to them that the designator should be 1M25F9W (FCC recommended em designator for CDMA) or if the application needs to be modified? Please let me know what else you need.

Thanks,
Steve
