Subject: Experimental application 0046-EX-PL-1999

To: Jim Barker

RE: Formus Communications, Inc., File No. 0046-EX-PL-1999

The above application is currently being reviewed. We are unable to process your application without additional information regarding the frequency bands and intended operations.

Please provide more detail describing your intended experiment and need to operate outside the LMDS bands. For example, the 25.25-27 Ghz band is a government allocation and operation in this band is unlikely without sufficient justification. We note that your previous STA, call sign WA9XA0 was only for the LMDS bands.

Please respond to my attention. Failure to provide the above information within 30 days may result in dismissal of your application under section 5.60(b) of the FCC rules.

Tony Serafini
