

Sir/Mam,

06/21/2016

We are requesting a 12 month RFA license for our system to facilitate the ongoing need for occasional system testing, maintenance and calibration to keep the GeoSAR radar mapping system operationally ready for DoD tasking, which is our perpetual duty under the current dual-use agreement. Note, frequency approvals for actual USG sponsored mapping missions within CONUS and its possessions will continue to be obtained separately on a case-by-case basis, according to the principles established in our Stage-4 license.

We anticipate that we would only use the test site 1-2 times per year for no more than 3-4 hours spread over 1-2 days. Due to the nature of the complexity of our system, the need to access the site for testing varies throughout the year and is unknown to us until the need arises, usually only 1-2 weeks ahead of time.

Thank you for your kind consideration.
