

File Number 011-EX-PL-2002

We previously applied for this experimental license to additionally cover a 100nm radius around Mojave, CA for mobile operation including flight. We still need to operate at that location through April 1, 2004. Please add this station location for ground mobile and flight operations to 100nm radius centered around NL 35deg 03min; WL 118deg 09min.

We will be testing our experimental telemetry system at this location July 17, 2002 through April 1, 2004.

Thank You,

Jim Toole
President, FunTech Systems
