Subject: Request for Info - STA File #0269-EX-ST-2007

Message:

1. In order to process your application further, NTIA requires the FCC to forward documentation from the applicant showing compliance with Section 8.3.28 of the NTIA Manual (<http://www.ntia.doc.gov/osmhome/redbook/8.pdf>).
2. Your answer to the "Why STA is necessary" question is "To allow us to Purchase, Install and operate a GPS repeater to Engineer and Test our products until Standard Licensing is obtained." What does "...until Standard Licensing is obtained" mean? If you mean that you will need experimental authorization for more than six months, you should re-file for a regular experimental license on Form 442. If you will need experimental authorization for less than six months, your requested period of operation is almost over. Are you still interested in pursuing a temporary authorization (provided that you don't need a regular experimental license)? If so, what is your new requested period of operation?

Submit this documentation as an attachment to this filing.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of January 08, 2008 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
