

PURPOSE OF MODIFICATION

This modification provides clarification of the maximum flight altitude for the Space Flight System, as specified in Condition 5 of Virgin Galactic's experimental authorization (File No. 0745-EX-CN-2020). Testing of the Space Flight System will occur up to a maximum altitude of 3500,AGL/350,000',AGL.

An updated AFTRCC coordination concurrence (dated March 2, 2021) is included with this application.
