Subject: Application for experimental license

Reference: FCC forms 159 and 442

Federal Communications Commission
Security Operations Staff, OMSD
Room 411
1919 M Street, N.W.
Washington, D.C. 20554

Galleon Wireless is seeking a temporary experimental license from the Federal Communications Commission in order to test and demonstrate our LMDS products.

Galleon is requesting four (4) individual 150MHz blocks of bandwidth within the LMDS band (27.50 – 28.35 GHz) to conduct product testing. This license will be used at our facility in Milpitas, California. Please find enclosed FCC forms 159 and 442 as required.

For questions or further clarification, please contact me at 858-550-1170.

Yours sincerely,

A handwritten signature in black ink that reads "Michael Phillips". The signature is fluid and cursive, with the first name "Michael" and last name "Phillips" clearly distinguishable.

Michael Phillips
Senior Manager,
Galleon Wireless
