

Exhibit 1: General STA Application Letter

Federal Communications Commission

Experimental Radio service

Subject : Request for Special Temporary Authorization (STA)
High Intensity Radiated Fields (HIRF) Threat Development – McNary Field, OR
Reference: 0260-EX-ST-2017 (Current Project)
Reference: 0533-EX-ST-2015 (Previously Approved STA for similar project at New Century Airport, KS)

This request for a Special Temporary Authorization (STA) is submitted in accordance with CFR 47, part 5.61. The purpose of this STA is to perform Low Level Swept Coupling (LLSC) testing on a Part 23, 25, 27, or 29 aircraft for the purpose of aircraft threat development for a High Intensity Radiated Field (HIRF) environment. The threat development determines the required equipment bench test levels. This test is required to satisfy the HIRF certification directives found in Exhibit 2. Further details are provided below.

Name and Address of Applicant

Garmin AT, Inc.
2345 Turner Rd SE
Salem OR 97302
Attn: Jared Shisler

Need for special action: The tests to be conducted include the use of swept frequencies from 500 KHz to 18 GHz with the exception of prohibited frequency bands. Testing using widely spaced discrete frequencies would miss possible critical resonant frequencies. The proposed testing will include the following.

From approximately 500 KHz to 400 MHz, the aircraft under test will be illuminated with a known low level swept frequency electromagnetic field and the resulting induced cable bundle currents will be measured on the aircraft using current probes.

From 100 MHz to 18 GHz, the aircraft under test will be illuminated with a known low level swept frequency electromagnetic field and the resulting electromagnetic field strengths will be measured within the various compartments of the aircraft.

Time and Date: Testing is planned to occur between the dates of May 1, 2017 and November 1, 2017.

Location: Proposed testing will occur at the Garmin flight test facility at Salem Municipal Airport – McNary Field Salem, Oregon (SLE). This is a company owned facility at the coordinates N 44° 54' 29", W 122° 59' 45".

Field Generation and Monitoring Test Equipment

Reference Exhibit 2 for equipment information.

Frequency Bands and Power:

Reference Exhibit 2 for further supplemental information on test frequency, modulation, and Effective Radiated Power (ERP).

Should you require additional information please contact Jared Shisler at 503-391-3389 or Email jared.shisler@garmin.com.
