Subject: Request for Info - File #0309-EX-PL-2016

Message:

1. There is much duplication of frequency and emission information. There are frequencies that are listed multiple times, emission designators that are listed multiple times and emission designators that have no bandwidth info. This needs to be cleaned up. Each frequency should only be listed once per ERP value and station class (FX or MO). All emission designators without bandwidths should be deleted and multiple copies of the same emission designator on a frequency should be deleted.
2. Since the authorization is to be used for the purpose of fulfilling the requirements of a contract with an agency of the United States Government, submit a narrative statement describing the project, the name of the contracting agency, and the contract number. A government point of contact, with phone number, who can verify the contract will also need to be provided.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of May 06, 2016 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
