Message:

Doug,
Thanks for your email....
Here is the paragraph that the Engineer provided this morning.
Please let me know if this will not be sufficient.
Thanks

N

Due to GA-ASI's continued business expansion and the urgency of supporting its military customers we need to be able to simultaneously fly more aircraft at our flight tests centers in Adelanto.

Our current license allows us to fly six aircraft simultaneously. Since each aircraft requires two uplink and two downlink channels to fly safely we are requesting a number of additional channels so that we can fly ten aircraft simultaneously.

The transmissions on the new channels we are requesting use the same equipment as we have currently licensed with the identical powers, antennas and modulation characteristics.
