Subject: Request for Info - File #0101-EX-PL-2008

Message:

FCC bureaus questioned extended period operation of government contract projects on frequencies shared with non-government users back in 2004 when stations WD2XGX, WD2XGY and WD2XGZ were originally approved. It was expected at this time that the applications for experimental licenses were meant as extensions of Special Temporary Authority and would not go on indefinitely. What are General Atomics' near- and long-term plans to move operations to government frequencies?

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of July 14, 2008 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
