Subject: Request for Info - File # 1293-EX-ST-2020

Message:

NTIA has the following question:

"If the purpose of the STA is to drop sonobuoys near San Clemente Island, and to fly from Yuma to that location, then why are the VHF frequencies only used in Yuma? It is confusing since the STA states that emitters will not radiate while in transit, but there are no VHF channels at the oceanic destination."

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of September 02, 2020 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
