

In reference to FCC 442 application number 0699-EX-CN-2022, the following changes were made to the application:

- January 25, 2022: requested frequency range changed to 9.2-10.2 GHz. FAA spectrum office stated that pre-coordination is not required for frequency range.
- February 1, 2022: Emission designator changed from "XXX" to "Q1N"
