

Amendment

This amendment is filed in response to the FCC's request for further information, dated August 21, 2006 with respect to the above referenced request for special temporary authority (File No. 0590-EX-ST-2006). The amendment makes the following changes to the pending request for special temporary authority:

1. Modifies the requested frequencies for the STA from 5900 – 6400 MHz to 5925 – 6425 MHz.
2. Provides additional information regarding the proposed tower site, along with the required antenna sketch.

This amendment renews its request for expedited processing of the special temporary request because of the time sensitive nature of this request.

Because this project has been classified "top-secret", the Federal Government prohibits General Dynamics Advance Information Systems ("GDAIS") from disclosing the name of the federal agency, the contact person at the agency, the project number, or the name of the project. Nor can GDAIS disclose information regarding which satellites are being used as points of information.

GDAIS has in the past filed Form 442 applications in this manner and received approval from the Federal Communications Commission with providing the confidential information, most recently for an application filed with the FCC in January 2002.
