Subject: Narrative Statement for Experimental License 0468-EX-PL-2012

Dear Sir/Madam:

An experimental license is needed to develop and demonstrate the capabilities of a prospective data communications system to Federal, State, and Public Safety organizations under an Internal Research and Development (IRAD) project.

This demonstration would require use of the public safety spectrum at the General Dynamics C4S Facility in Arlington, VA. The spectrum will be used to demonstrate Long Term Evolution (LTE) equipment developed by General Dynamics for use by the public safety community.

Please contact me if you need any additional information or have any questions.

Regards,

Gil O. Estrella
