

Exhibit 1

In connection with this renewal application, it is respectfully requested that upon grant of the application the license be issued with the same "XT" Station class, as the license is used to support internal range development and characterization, and Independent Research and Development (IR&D) as well as contract activities.

Although internal range development and characterization, and IR&D are not associated with any particular contract, such internal experimental use is essential to demonstrate and verify the licensee's ability to meet the needs required of its customers. As to the manufacture of radomes for the F-18, F-5 and AV-8B aircraft, the contracts pursuant to which these experiments will be conducted are currently as follows:

Customer Name: US Navy/Boeing
Customer Contact: Elizabeth McCown 314-777-0315
Contract Number: N00019-09-C-0019
DPAS Rating: DOA1

Customer Name: US Navy/Boeing
