SUBJECT: Description of Research and Development Program of General Dynamics Robotics Systems (GDRS)

1. GDRS has a contract with the Boeing Corporation to work on Crew Station work load. This effort is an Independent Research and Development (IRD) program. Boeing is the Principal Contractor and GDRS is the Sub Contractor. The efforts may encompass work done in the future on the Future Combat System.
2. The program will consist of two platforms or stations that will need to communicate with each other. One will consist of crews stations that crew members will operate from.
3. Point of contact at GDRS is Mr. Neil Hamill, nhamill@gdrs.com, 410 876-9200.

Neil Hamill
Test Engineer
