Reference Information from OET email:

Applicant: General Dynamics

File Number: 0445-EX-PL-2009

Correspondence Reference Number: 9860

Date of Original Email: 12/15/2009

To: Mr. Doug Young

In response to your email, the previous license (0358-EX-PL-2008) and the current filing are for two separate test laboratories within a common facility. Each of these test labs require a dedicated GPS Re-Radiator system for equipment testing, to be performed under the same government contract.

It was my understanding that a separate FCC license was required for each GPS Re-Radiator system that is installed within a facility. If this is not the case, and a common license can be used for multiple systems, then we would not require this additional license. This seems reasonable since, as you mention, these GPS Re-Radiator systems do operate on the same frequencies.

Please advise and let me know if you have any other questions.

Thank you very much.

Regards,
Gil Estrella
