

SUPPLEMENTAL STATEMENT
Item 12--Form 442

Commission grant of this application would not have a significant effect on the environment. The applicant has evaluated its facilities and operations in terms defined in Rule Part 1, Subpart 1, "Procedures Implementing the National Environmental Policy Act of 1969" and finds that this application will not represent an action covered by Rule Section 1.1307.

Applicant is familiar with the "Guidelines for Human Exposure to (non-ionizing) Radio Frequency Radiation" as detailed in the Commission's OST Bulletin No. 65. The operation of the proposed experimental station will not cause radiation density levels in excess of the limits discussed therein (ANSI C95.1-1982) in any area accessible to the general public. Power will be removed when authorized personnel are in the vicinity of the transmitting antenna.
