

SUPPLEMENTAL STATEMENT

KA2XNR

This statement is submitted with the renewal papers for this Experimental Radio Station in accordance with the requirements announced by the Commission on March 13, 1985 in Docket 79-144.

The Commission's grant of this application would not have a significant effect upon the environment. The applicant has referred to Section 1.1306 of the Rules for actions that are categorically excluded from environmental processing. This application is not excluded under Section 1.1306, but neither is it one requiring an Environmental Assessment (EA) as defined in Sections 1.1307 and 1.1311.

Applicant is familiar with the Guidelines for Human Exposure to (nonionizing) Radiofrequency Radiation as discussed in the Commission's OST Bulletin No. 65. The operation of this Experimental Radio Station will not cause radiation density levels in excess of the limit described in the ANSI C.95.1-1982 guide in any area accessible to the general public. Power will be turned off whenever workers are in an area where the power density level is at or in excess of the referenced ANSI guideline.
