

EXHIBIT 5: Modification to Existing License

A. Describe what is being modified and why.

- a. The Radio Station Construction Permit and License for call sign WI2XCL has been modified to include three additional CODAR (Coastal Ocean Dynamics Applications Radar) systems for activation along the Texas coast. These units were purchased and were not included in the initial application. The manufacturer, frequency, and emissions information for the additional three CODAR are the same as the CODAR in the initial application.
