

Description of Modification
FCC File No. 0151-EX-ML-2016

The following is a list of modifications for FCC file number 0151-EX-ML-2016:

- The mobile station centered at 29° 00' 28"N 95° 12' 53"W in Freeport, Texas has been changed to a fixed station at 29° 00' 28"N 95° 12' 53"W in Freeport, Texas.
- The mobile station centered at 28° 35' 47"N 95° 58' 44"W in Matagorda, Texas has been changed to a fixed station at 28° 36' 16"N 95° 57' 38"W in Matagorda Bay Nature Park in Matagorda, Texas.
- The mobile station centered at 27° 49' 41"N 97° 03' 12"W in Port Aransas, Texas has been changed to a fixed station at 27° 25' 16"N 97° 18' 00"W in Padre Island National Seashore in Corpus Christi, Texas.
- A CODAR Ocean Sensor fixed station has been added at 28° 06' 40"N 96° 47' 35"W on the barrier island of Aransas National Wildlife Refuge closest to Austwell, Texas.

Below is an explanation of the modification:

The mobile stations were updated to fixed stations as a result of permission and permits acquired to install CODAR Ocean Sensors at these locations. Each corresponding "fixed" location is within the operating range for the previously listed mobile station. A fifth CODAR Ocean Sensor is also listed as we have permission to install another system at this location. All fixed stations have the same frequency range and emission information.
