COMMENTS: Other than enjoying the broadcasts and using them to improve the receiving equipment , i have two granddaughters that have taken a real interest in the radios and shortwave listening. The youngest (3 years) is intrigued by the the dancing of the printer and the oldest * years) actually uses one of my 651's to tune in various broadcasts (voice) from other country's . She likes to read the teletype material as well although she does not understand most of what is being printed , she asks a lot of questions . I would like to see the broadcasts continue. Thank you George,

for what you have given us for the last year and a half .. Fred WB6AKQ

COMMENTS: I appreciate having the WC2XPF RTTY broadcast services available, and very much hope that the FCC will renew their license.

Further, I would like to see the FCC allow George & WC2XPF to widen the range of frequencies on which they can transmit. If WC2XPF would be allowed to transmit on a lower frequency (possibly around 4 - 5 MHz), then better service would be provided to close-in listeners like myself.

many thanks Dave Ross N7EPI ross@hypertools.com

COMMENTS: As a collector of vintage RTTY equipment I would be lost without the broadcasts from WCX2XPF. As an amateur radio operator I have used the transmissions to display RTTY operations to other Hams to increase the interests in the hobby. During Field Day operations WC2XPF has been printed to display to the public the technology of Amateur Radio and RTTY. As a SWL operator I periodically print the complete news broadcasts as a matter of interest in current events, as the information carried by WC2XPF is of interest and not carried on the normal news broadcasts. Thanks to WC2XPF

for the continued support and keeping RTTY alive.

COMMENTS: This service provided by WC2XPF is both informative (for the content) and challenging. It provides a platform for development of improved reception methods for radioteleprinter/wireless data communications. It is also another means for the dissemination of current news and, potentially, for disaster communications broadcasts. Because it is based upon simpler electrical and mechanical technology, radioteletype has a higher survivability potential than computer-based "automated" systems. This could be of value to the country if a broadbased broadcast facility is needed to backup government systems.

COMMENTS: Renewal of this license is in line with the true traditions of the Amateur Radio Service and its long history of service to the American people. Radioteletype provided me with a long and rich career and gave me the start to where I am today, a true communications professional. The ability to demonstrate the workings of RTTY today in a real life situation helps to attract the younger set to our fascinating hobby. WC2XPF is part of that tradition which will keep America at the forefront of technological innovation. I support the WC2XPF initiative and recommend renewal.

Hi George,

> We will be submitting an application for renewal of WC2XPF's License at >
the end of this month or the beginning of March.

> Please keep the broadcasts going. Although I have never heard it, I have
listened several times, and will continue to listen.

73s RAY vk2ilv

COMMENTS: I find that this station, WC2XPF, provides a very usefull signal for my long term investigation on the effects that the changing ionsphere has upon trans - equitorial crossings of FSK signals. As this study is of a long term nature it has been valuable to see the effects happening during the recent sun spot maximum and how propagation has changed now the the current cycle is declining.

The station has also provided me with interesting copy and has enabled me to exercise my collection of teletype machines on a real print out of live rtty FSK signals.

I consider this station to have great value and indeed its continued existance is vital to my continuing ionspheric study.

Ted Minchin ZL1MT

COMMENTS: Collecting vintage communications gear is a great hobby, but using it is the real thrill. WC2XPF and its previous incarnation (the callsign escapes me) are truly an historic treasure! The news, weather and technical information given on the broadcast are very useful. Please keep up this wonderful service. You are the -only- RTTY broadcast for public consumption! I monitor/print the signal about 3 times a week and have done so since day 1. Keep it up! Thanks!

And an additional note from Mr. Rumbaugh:

You know how much I enjoy the broadcast George!

2 thought for you...

More Military related press-releases/news feeds please!

Could you run a 6994khz 850hz, Reverse broadcast? This would accomodate the PRC-47 units and other USB only Military teletypes and radios. Print on the 85R broadcasts has been fair here. Some of the nights with highspeed 850 have been excellent!

Best of luck with the FCC biz. I left my message on the webform. Can I do anything else?

-Fib

COMMENTS: WC2XPF provides an important public service and helps to preserve a historic means of radio communications that represents what was once the state of the art. The transmissions of WC2XPF - reliable, professional and conducted with the highest standards - have allowed us at the Maritime Radio Historical Society to operate our teleprinters just as the were once operated, with a real over-the-air signal. These teleprinters are part of our project to restore historic ex-RCA coast station KPH (see <http://www.radiomarine.org>). Even if we don't print the transmission we will tune to the appropriate frequency just to confirm that WC2XPF is on the air. These transmissions would be sorely missed if they ceased.

COMMENTS: Absolutely fantastic! I stumbled across your station by accident while I was looking for digital modes on HF and decoding whatever I came across. Your station is informative and gives me a slant on a wide variety

of issues not covered by internet, or domestic media. Today Feb 9, 2002, I read with interest what was happening 50 years ago in the Korean war. I am 38 and too young to remember, but little did I know what was going on behind the scenes at that time. With what George Bush has to say about North Korea now..remember I am a Canadian..seems to reflect the info I read about what the communist political posturing began 50 years ago. When I tuned into your broadcast I thought I was listening to a news wire service! Needless to say, keep up the good work. I especially enjoy news about the Armed services..Armed Service radio is hard to get, and military.com and web related service just doesn't do the volume. Thanks again, Dan Neves

COMMENTS: Your transmissions are absolutely terrific and meet a very useful need. With the loss of news services such as upi and reuters on the shortwaves, your service is very useful to ships at sea. I have crossed the Atlantic several times by small yacht and would have loved to receive your news broadcasts. Keep up the good work.

A text version of the schedule on the web site would be very useful.

COMMENTS: Hi ! I'm a seek and sock typist so my provider shuts me down, since they think there is no activity...hi hi I'll send you my comments by E-mail later today.. But for now, what is 85R shift, that you use on your TTY transmissions???? 73 es CUL Stan W9LG w9lgstan@aol.com

The later Note From Mr. Garstka reads as follows: (Re-formatted for easier reading)

Hi !

Here are my comments about the RTTY Broadcasts from WC2XPF...

I've been a RTTY enthusiast since getting into Amateur Radio TTY during the 1960's...For the past 20 or 25 years the only RTTY that I could print was from Amateur Radio QSO's.....

About two weeks ago, while scanning the short wave freqs, I heard the familiar sound of 170 shift, 60 speed, RTTY signals, so I turned on the old reliable 15, and there it was, eurica, I found what Ive been looking for.. It was a good feeling to copy TTY again, and copy the current news.....

I sent an E-mail to ARRL and to QST magazine regarding your RTTY broadcast, because I'm sure there are other TTY enthusiasts that would like to print something more interesting than routine Ham Jibberish.....hi hi

I've been tuned in whenever propagation is good, and find that your material is excellent...

In addition, the quality of the station signals, is as good as any I've ever heard, and it is very obvious that the operation of WC2XPF shows great professionalism.....

Thanks for putting WC2XPF on the Air. 73 Stan W9LG

COMMENTS: I recently became aware of RTTY.com's broadcasts through a commercial bulletin board (Grove/MT). I am a former US Army Signals Intercept Operator (MOS 98G) who enjoys listening to international broadcasts on shortwave. I am not a Ham operator, therefore, I do not have the "interface" with others to communicate via non-voice methods. I have been aware of the various types of non-voice communications for some time, and my obvious interests/history in this area has led me to academic research on these modes, but no practical experience. Ham-to-ham communications are difficult for me to locate, and despite my past experience, I am not in this to "read other people's mail". I quite enjoy the opportunity to receive intended broadcast material in this manner and look forward to continuing to do so.

Additionally, recent unpleasantness' have demonstrated the need to exploit any and all means of communication available. Cable, satellites, land-line and cellular telephones all have finite bandwidth and stability. It would be a shame to lose such an infrastructure-independant medium of communication and information dissemination (broadcasts I have copied contain mostly relevant international/national news).

I just wished to add my support to the continuation of these broadcasts, and to let everyone know that it is enjoyed by non-licensed, listen-only radio operators.

My preferred method of contact is via e-mail and I will enthusiastically respond if there are any further questions or support I can provide.

COMMENTS: Just a small gripe.

Why do you insist on listing your transmitting schedules and times in PST? Nobody outside the US uses PST. It just seems the usual USA-centric view of the universe. Why not list the times in GMT/zulu and put PST in brackets for those poor souls who cannot convert one into the other.

Please don't go off the air just yet. I have finally blown the dust off my Model 15 and would like to get it back into working condition.

74 de Jim

COMMENTS: For once the shortwave bands are being put to decent use. This is the kind of thing we need more of. As apposed to the beggers on the high power stations, who claim to be non-profit and do nothing but beg for money. I have stopped listening to them!! Too boring..... WC2XPF needs to have government support for Homeland Defense. This could be a key asset in the coming terrorist attacks. We need to upgrade their power and antenna systems. Maybe they could use part of the old VOA site and antenna system. A good co-use of a Government asset and civilian operation. This is done at various air bases throughout the world. CAFB(Charlston, SC is an example). Renew this license....without doubt.

Cory Hine/N2AQS/AFA4TZ USAF MARS

COMMENTS: RTTY is just one form of the many modes of communications (CW, AM, etc.) which has contributed to the overall evolution of modern radio as we think of it today.

I appreciate the efforts that has been put forth by the people at rtty.com to help keep this part of our communications history alive and well.

They are doing an excellent job in helping to know where we have been and how we got here, so we will have a better idea of where we are going as we head on into the future.

COMMENTS: A very good service which is needed to:

1. Use as a reference to adjust equipment.
2. Use to determine how propagation effects RTTY transmissions over a long period of time.
3. Show other Radio enthusiasts a form of communication that was important some years back.
4. Obtain information of interest.

Thanks

Kirk W3AW

COMMENTS: WC2XPF's transmissions received regularly, and would like to see it continue on a permanent basis. I have conducted demonstrations of mechanical and electromechanical teleprinting equipment and computers to students and the general public using WC2XPF transmissions. In addition, HF RTTY news broadcasts are also useful in their own right.

Would like to see more 850 and 85 shift skeds for demonstration of military equipment.

COMMENTS: I have a brace of Model 28's sleeping in my basement and waiting for my 2 year old boy to grow old enough to allow me time to restore them.

Teletype machines and baudot code are a part of our communications history that we need to keep alive and now there is almost no baudot activity left - even in the amateur bands - and what use remains is mostly computer activity.

It is only us fools who have kept a small number of these machines from becoming landfill with the rest. This is history like nobody born today will ever see without our help.

Stay on the air, I need somebody to listen to when I get this Model 28 tied into my R390 and my DX100.

COMMENTS: I look forward to and enjoy the broadcasts very much. I think
that it is important to maintain the ability to present such broadcasts.

RTTY should not be considered an obsolete form of broadcast dissemination
but just another alternative method.

Keep it up!

George: I was copying WC2XPF on both frequencies yesterday. I am located in
Memphis,Tn. I am using the following: A JRC-NRD-525 Rx & a INFO-TECH M6000
Multicode Receiver. The Rx Antenna here is: a 110ft Longwire with a ICE
Beverage Longwire Matching Unit, Fed with RG-8X coax.The Ant is oriented
NNE to SSW. The signal strength is about S2-S4, but no problem copying.
There is however at various times some other SSB stations very near the

13972 KHZ frequency.They only come in about 10% or less of the time. I could not identify who they were. I may try my R-390A at a later date as I will have to make up some more interface cables for the decoder.I have sent in the License Renewal Survey. I hope you are able to continue with transmissions.I received the 6994 KHZ frequency stronger about S6-S8. Do you know if there are any other RTTY stations on now besides the "Hams" ??? I don't think there are many (ANY???) left! Temp here yesterday was about high of 55 degrees lower 40's at night. Weather was clear. Anyway the best to you & your family. Best Regards, Roger Nash KE4EP0

COMMENTS: I am in the US Army and would like to see WC2XPF continue to broadcast.

I have been a military TTY operator for many years and I feel that we should keep this "Art" alive.

History has shown that you would at a "Tactical Loss" to give up using TTY and not be able to communicate in a Nuclear environment with most other radio gear.

We must pass this technology to all that are interested in radio.

Please do not shut down this operation. we need it, and sometimes have little more to do that is as inexpensive to enjoy.

History is Worth Preserving, This is History Now!

Warren Brader, Commo Chief 316th QM Co. (WS) US Army Reserve

COMMENTS: I find the choice of news sources for these broadcasts extremely biased towards right-wing and Christian values. The bigotted, intolerant, insensitive and downright jingoistic opinions expressed are surprising, to say the least.

What a shame, because in my view this renders the editorial content totally useless. Since my interest in the transmissions is motivated purely by a fascination with shortwave radio, I would still like to see them continue,

possibly with more well-rounded content, however.

COMMENTS: Teletype machines have faded into our history. It is great to see a radio station keeping this bit of communications history alive by providing a source of material to be received by radio Teletype. I personally have been keeping a radio Teletype schedule with a friend of mine, Bart Bartlett, W6OWP for 45 years. I hope WC2XPF can continue operation even longer.

C. Marvin Collins, W6OQI recently retired Chief Engineer KFI/KOST Los Angeles, California

COMMENTS: This is a very valuable service to me. I still operate Baudot rtty and this station supplies a good stable signal for testing receiving equipment. The

provided information is also useful and is interesting to copy. Because of the transmit only function, when it is on the air, it is a good source signal for demonstrating RTTY. The license should definitely be renewed.

COMMENTS: Seems as you guys are only ones nowadays that transmit decipherable RTTY on HF. Used to listen to UPI and other foreign news broadcasts on RTTY, but they have all disappeared. Sort of nice to be able to tune in you folks and fire up the old tube equipment and mechanical machines, or use modern computerized equipment and be able to actually print something other than contesters in the ham bands. I don't listen to all of your broadcasts, but do so at least 2 or 3 times a month and thouroughly enjoy doing so.

Hope FCC will give green light and renew your license!

COMMENTS: Stumbled into ur website by search engine. Very pleased to see 60wpm
rtty on the air somewhere. This spurs me to get the old machine going. This
one came from WU as surplus in 1968. Built a simple Terminal unit. Haven't used
it since.

I feel that anything done to preserve traditional Amateur Radio is very
valuable. I feel that ur station is important for this reason.

COMMENTS: Liten to your broadcasts on a regular basis. One of the few places to
get unaltered news from more than one source. Keep up the good work...and I hope
that your license is renewed.

COMMENTS: Great service you provide via WC2XPF. Not only does it keep one's RTTY copying skills sharp, it also provides news coverage like no other. I usually copy on my PC with homebrew TU and software. When I want hard copy, I flip on the good old Model 28. Usually the 14MHz frequency is best here. Keep up the good work and hope you can keep things going.

COMMENTS: hopefully the FCC will give you guys a renewal. its a great idea to have a rtty station such as the one you have with your format. much could be done with this.

good luck
