Subject: Request for Info - File #0482-EX-PL-2012

Message:

1. Is the center frequency always 9.5 GHz or does it change within the 9.2 – 9.8 GHz band?
2. For coordination purposes, your areas of operation must be defined as either a center point with a radius or a rectangle with coordinates of the four corners. Submit your areas in one of these formats.
3. You have marked three exhibits to be withheld from public inspection. You must justify the need for this confidentiality. Either request that we unmark the withhold from public statuses or identify the parts of the application that you want withheld from public inspection, separate them out from anything that should be available to the public and submit a justification for the confidentiality request. Submit an exhibit that supplies the information in an item-by-item summary of subparts 1-9 of 47CFR0.459(b). The justification exhibit must be available for public viewing.

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information within 30 days of September 12, 2012 may result in application dismissal pursuant to Section 5.67 and forfeiture of the filing fee pursuant to Section 1.1108.
