Subject: Request for Info - File #0550-EX-PL-2006

---

Message:

In accordance with the conversation that our legal counsel had with your office, Gibbons Systems Inc. (Gibbons) hereby notifies the OET that it is working actively with the FAA to achieve the coordination of the 2700-3000 MHz band. Because we are unsure of when the FAA will issue that coordination, we hereby request an extension of the 30 days period in which Gibbons is required to provide OET with that notification. We will continue to keep your office apprised of the progress of the coordination process.
