Subject: Request for Info - File #0550-EX-PL-2006

Message:

In response to the OET's email of 7/14/2008, we are providing the following update regarding coordination efforts with the FAA regarding use of the 2700-3000 MHz band.

Gibbons has been in consistent communication with Mike Carroll at DARPA, who indicated that coordination with the various Federal agencies has been proceeding. The program for which experimental authority is being sought has been announced within the agencies. A copy of that announcement is found here:

https://www.fbo.gov/index?s=opportunity&mode=form&id=7d54c9db092a24cdd6c2c46eedb5a573&tab=core&_cview=0

Mr. Carroll has initiated contact with the FAA to work on the specific coordination issues raised by them. The FAA has a new engineer in place overseeing coordination of this particular band, with whom Mr. Carroll is in direct contact.

Gibbons respectfully requests that OET continue to provide time in which these coordination conversations can proceed.
